Description:

Pike & Shotte is Warlord Games third rulebook publication. It is a beautiful book in its own right with hundreds of colour photo of the most exquisitely painted model soldiers taken from the worlds foremost collections. The rule books intention is to inspire a collector to play gentlemanly

games with their collections of soldiers with friends.

This pike and shot rules set is based on a previous rules set called Black Powder. After playtesting these rules, they are playable and usable. They are British in their nature and could have totally been a supplement to Black Powder, but they repeat many of the same mechanics. The author fully discloses this. They are excessively verbose (read that as a lot of snooze with opinions about how you should behave, how you should play, etc.). After multiple readings, if you can integrate the special characteristics, they seem playable. They have a certain Warhammer feel, although, different. The Black Powder author, Rick Priestly, authored 1644, a very Warhammer type of rules set. As far as gaming, they seem very much oriented towards an intimate group of friends (about 2 to 6 people) with a very standard mechanism set with special unit rules that allow the scenario creator to use these special rules to create units within the game to reflect the pike and shot period differences (e.g. Swiss dominance in early periods to evolution of New Model Army in the ECW period). I play ECW exclusively and during multiple play tests, the gamers I played with found these rules easy to understand by the 2nd or 3rd turn of the game. There are some challenges in understanding the game play, like the disordered mechanic. There were some other written inconsistencies (small number), like the leader bonuses in combat. Usable rules. Verbose and boring to read through. Typical glossy pictures oriented rules. Not a lot of direction on how to use the special rules to reflect the specific theater or period you are trying to use the rules for.
